CUILLIER CAREER CENTER'S CAREER AWARENESS DAY

Photos taken by: Kourtney Schouest and Tyrrike Jones

This year, Cuiller continued its tradition of offering an opportunity for the students to speak directly to the industry that their classes are related to. This year's event was a great success as always and the attendance was improved from last year. The students were excited to ask questions and present their work before the working people of their industries. Many were interested in opportunities after high school and some were fortunate enough to gain access into a summer position as an intern or apprentice.

We accomplished much for this year's Career Awareness Day but we can still improve upon what we have. As we reach out to local business leaders and industry workers, we ask that you also do some research and spread the word about this awesome event. Hopefully more opportunities arise for our student because we only want the best for them.
